Challenge #9: Video and Forms

Objectives:

1. Implement embed video using iframe and local file video (mp4).
2. Include Contact forms with design in your project.
3. Present this during our laboratory and discuss in the class.
4. Submit here the documentation screenshots with caption in PDF format.

Name: Apple Shane M. Mallo 1BSInfoSys-B

```
32          <iframe width="560" height="315" src="https://www.youtube.com/embed/3dJKRehwKnY" title="YouTube video player"
33          frameborder="0" allow="accelerometer; autoplay; clipboard-write; encrypted-media; gyroscope; picture-in-picture"
34          allowfullscreen></iframe>
35      </div>
36    </div>
37      </div>
38
39      </body>
40      </html>
41
```

This is how I implement embed video using iframe in mywebsite.

This is the final output after the implementation.

```html
HTML1.html        <> ABOUT.html ●      <> COTACT.html ✕      # StyleSheet.css

<> COTACT.html > ⬡ html > ⬡ head > ⬡ body
10
11          <div class="hero">
12              <nav>
13              <a href="-" class="logo">GO GREEN<i class="fa-solid fa-leaf"></i>
14              </a>
15               <script src="https://kit.fontawesome.com/f4c86afff5.js" crossorigin="anonymous"></sc
16                <ul>
17                    <li><a href="HTML1.html">HOME</a></li>
18                   <li><a href="ABOUT.html">ABOUT</a></li>
19                   <li><a href="COTACT.html">CONTACT</a></li>
20                </ul>
21              </nav>
22
23           <div class="contact.us">
24              <h2>CONTACT</h2>
25          <div class="contact-box">
26           <form>
27             <input type="text" class="input-field" placeholder="Your Name">
28             <input type="email" class="input-field" placeholder="Your Email">
29             <input type="text" class="input-field" placeholder="Subject">
30             <textarea type="text" class="input-field" placeholder="Your Name">
31             </textarea>
32             <button type="button" class="btn">Send Message</button>
33           </form>
34
35
36          </div>
37          </div>
38          </div>
```

And for the contact forms with design, this is howI implement it.
